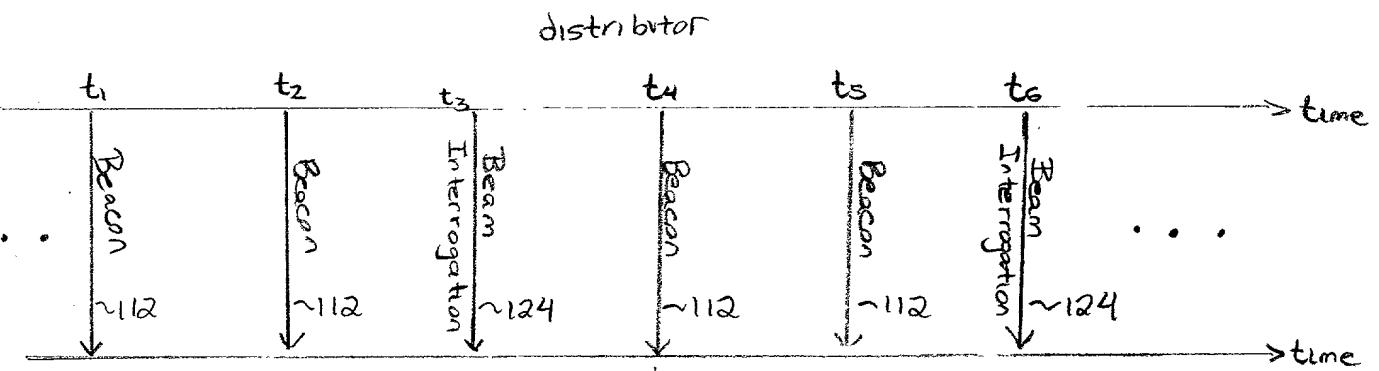

Fig. 9

Fig. 9 shows the timing of events for the distributor. The x-axis represents time. The distributor sends beacons at approximately 112 and 124. It also sends an interrogation at approximately 124.

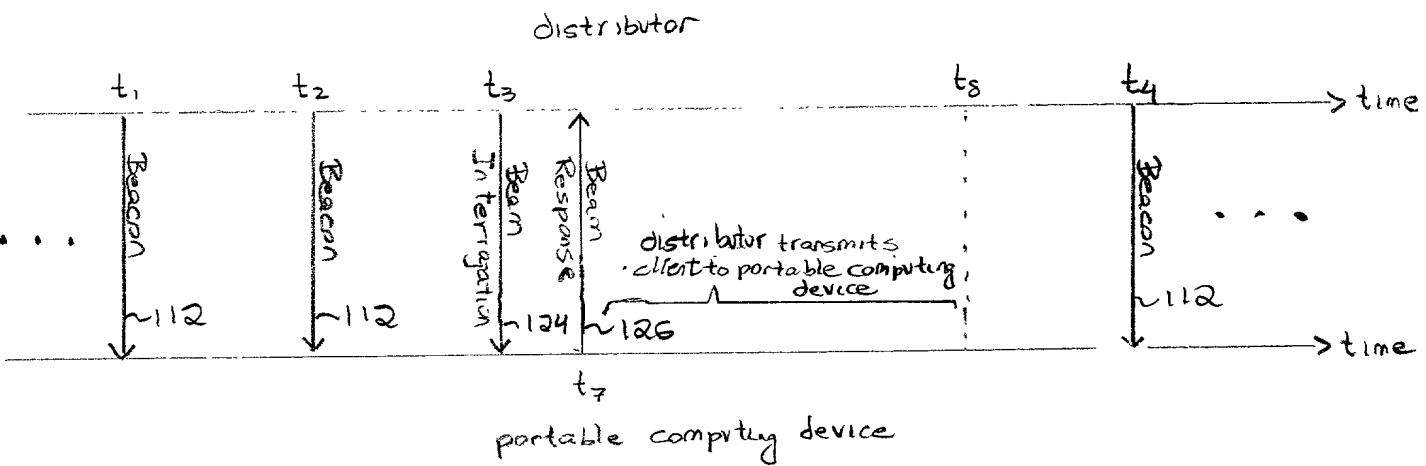

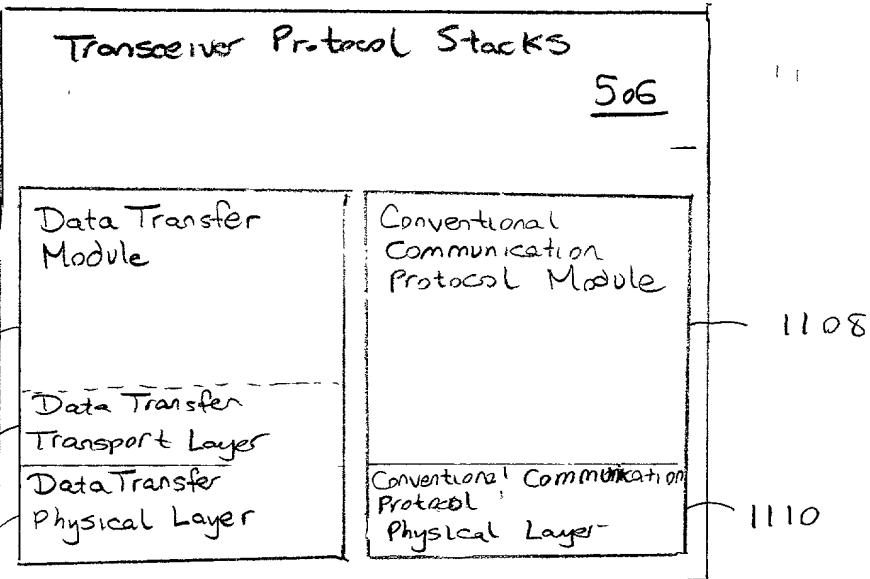

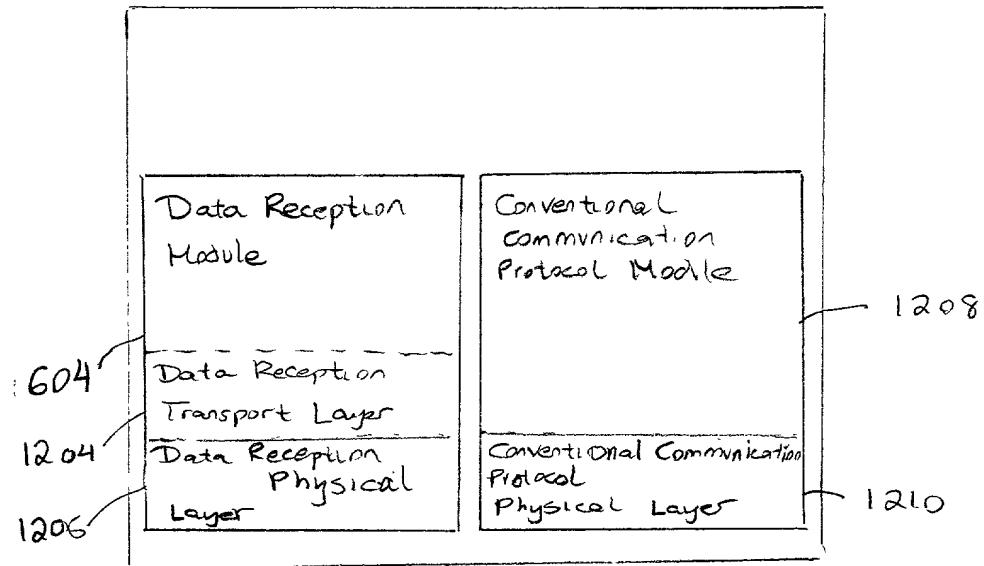

Fig. 10

Fig. 10 shows the timing of events for the distributor and a portable computing device. The distributor sends beacons at approximately 112 and 124. It also sends an interrogation at approximately 124. A response is sent from the distributor to the portable computing device at approximately 126.
